### INTRODUCTION

### BO In 195 a com M400 soon brand equip

#### **BOBCAT'S HISTORY**

In 1958, Melroe Manufacturing Company introduced a compact front-end loader that evolved quickly into the M400, the world's first true skid steer loader. The company soon adopted what became the world-famous 'Bobcat' brand – and its success paved the way for the global compact equipment industry we know today.

#### **▶** INNOVATION CENTRE IN DOBŘÍŠ

New technologies and machines are rigorously tested to take on the toughest jobs.

#### **BOBCAT TODAY**

Since developing Compact Excavators with Zero-House Swing functionality in 1984, Bobcat has continued to innovate. Today, our equipment is known for providing all the power you need, where you need it, without extra hassle.

#### **OUR MISSION**

We empower operators to accomplish more, while working in the toughest conditions and tightest situations. When our customers have the will, we provide the way.

# BUILT AROUND THE OPERATOR

#### **▶** REDEFINING INDUSTRY STANDARDS

The Bobcat R-Series E26 – E27z – E27 are built around the operator to provide superior power, a roomy comfortable cab, easy operation, great visibility and amazing stability, while remaining compact.

Full control of your surroundings – thanks to the great visibility through larger glass area and excellent ergonomics

P. 8

Metal covers that open and close effortlessly for easy maintenance

Mechanically controlled Stage V engine with auto idling functionality

Hydraulic oil level visible from outside P. 10

Heavy counterweight within zero tail profile P.7.

Upper-structure tie-downs for easy transportation

Autoshift travel motors

#### **▶** PERFORMANCE

Increased power and controllability despite being lighter than the previous generation.

#### **STABILITY**

Best-in-class stability with all 3 concepts (zero house swing, minimal swing and conventional).

#### **▶** CONTROLLABILITY

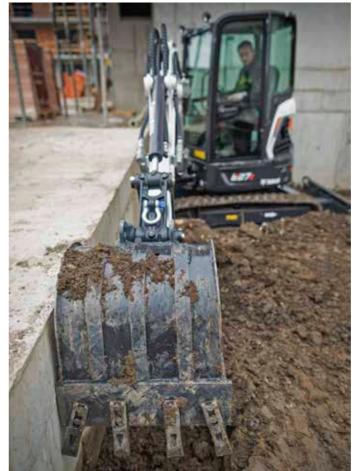

The optimized hydraulic system and the new joysticks guarantee best-in-class controllability.

#### **▶** TRANSPORTABILITY

All 3 new Bobcat models are towable on most trailers in all configurations.

### **PERFORMANCE**

#### **LIGHTER WITH MORE STABILITY**

Heavier machines are more expensive, harder to transport and less fuel-efficient. Our latest Compact Excavators are compact and lightweight without compromising full 360° stability.

#### **▶ SMOOTH POWER**

Exceptional combination of traditional Bobcat performance and best-in-class controllability. Bobcat equipment has always been made to go where the work is - our machines are highly maneuverable with simple, precise and intuitive controls, even at full power.

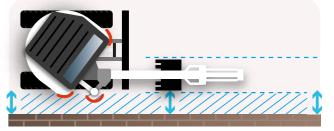

### **POWER WHERE YOU NEED IT**

#### ▶ RIGHT TOOL FOR THE JOB

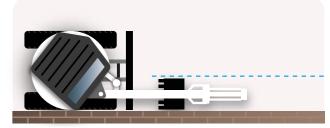

In backyards, urban areas and other tight-fitting job sites, a big machine means big challenges. Bobcat machines allow operators to work in constrained environments, in extreme proximity to walls and other challenging situations.

#### **▶ ZERO HOUSE SWING – E27**z

The Bobcat Zero House Swing (ZHS) concept enhances Zero Tail Swing (ZTS) functionality by further protecting the front upper-structure corners turning within the swing circle. The design also eliminates the protrusion of the boom swing cylinder during parallel digging.

Zero Tail Swing (ZTS)

Zero House Swing (ZHS)

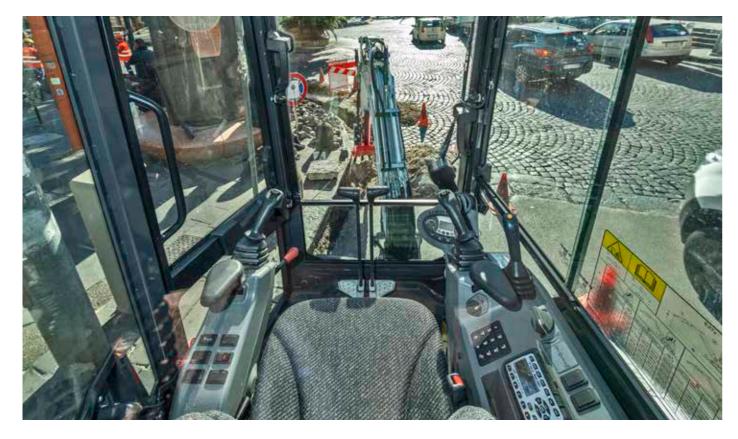

### **STEP INSIDE**

▶ BUILT AROUND THE OPERATOR

Clear and easy to reach, the display features an indicator for the automatic light switch-off function, optional keyless ignition and operational information.

#### **▶** IN ALL WEATHER CONDITIONS

Stay comfortable and focused on the job all year round with direct cab temperature control at your fingertips.

#### **▶** RADIO WITH CONNECTIVITY

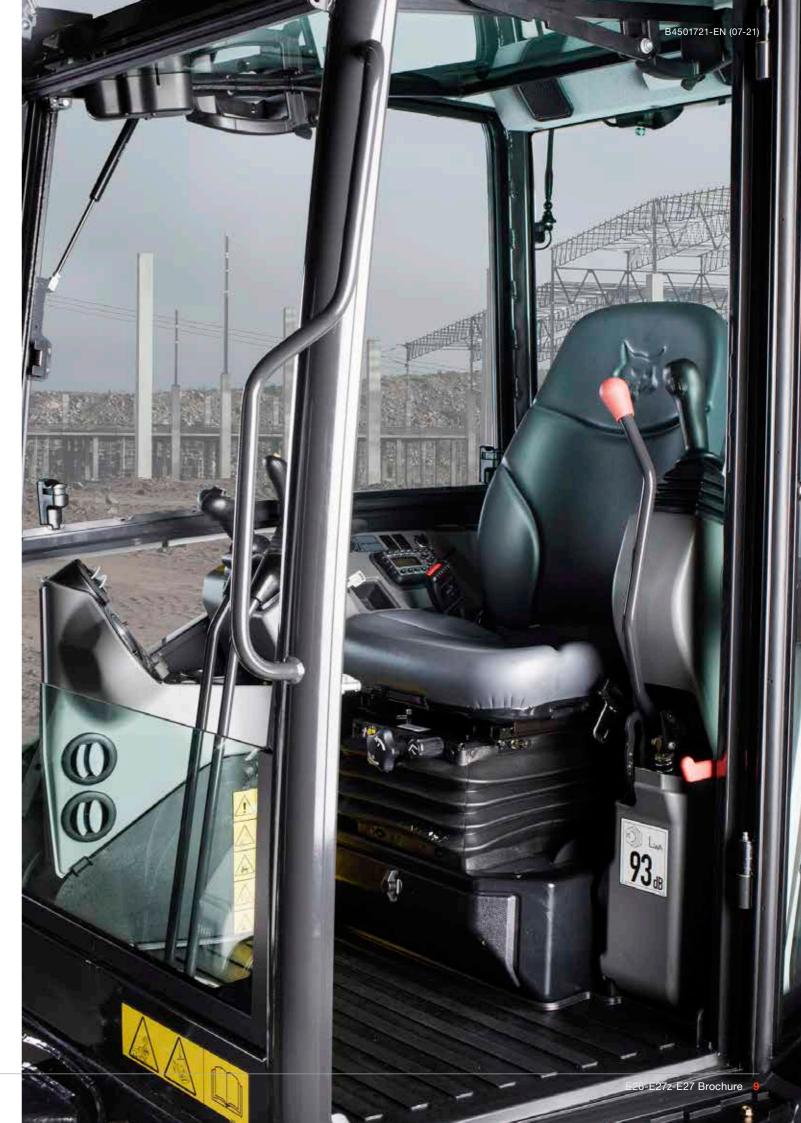

Bobcat knows your job is tough. Tune into your favorite radio station and breeze through any task.

### **▶ INSTRUMENT PANEL**

A new enhanced instrument panel is now standard on all new Bobcat compact excavators.

SERVICEABILITY & WARRANTY

## **BUILT TO LAST**

#### **▶ ENGINEERED TO PERFECTION**

Feel the superior fit & finish down to the last bolt and screw. The exterior, covers, cab and canopy, controls and workgroup will exceed your expectations year after year. With durable construction and materials tested for endurance in extreme conditions, your business will keep moving forward.

#### **SMART MAINTENANCE**

Always understand the condition of your machine thanks to a self-diagnostic system with clear error codes on the control panel display. Access all maintenance areas quickly thanks to a 2-piece floor mat, easily removable floor covers and side-byside cooler placement for simple cleaning.

## THERE'S NO TIME FOR DOWNTIME. STAND UP TO THE HARSHEST CONDITIONS. DAY AFTER DAY.

#### **STANDARD WARRANTY**

Bobcat develops every machine to the highest standards of quality and durability. That's the reason our standard warranty provides 24 months or 2000 operating hours (whichever occurs first) of coverage.

#### **▶ PROTECTION PLUS EXTENDED WARRANTY**

Enjoy total peace of mind with Protection Plus® extended warranty. Providing the same level of protection as the standard warranty, Protection Plus also reflects different customer needs and expectations by offering a choice of durations and annual operating hours. According to your needs, you can benefit from the coverage for up to 5 years or 6000 engine hours. And Protection Plus is transferrable – so it will likely increase your machine's resale value.

#### **▶** BOBCARE

A long-running machine starts with proper planned maintenance, which helps protect against repair costs and unplanned failures when you count on your machine to work.

- Avoid risk by preventing major repairs and complete failures.
- Accomplish more by reducing downtime and increasing your productivity and profitability.

E26-E27z-E27 Brochure 11

#### **▶** MACHINE IQ

BOBCAT® Machine IQ Wireless Communications enhances the support for your Bobcat machine.

- Durable built-in monitoring electronics
- Data is available to our machine monitoring specialist
- Maintenance is optimized for your business
- Data-driven services maximize uptime

B4501721-EN (07-21) LINEUP

### **E26**

#### **▶ LIGHTER AND TOUGHER**

- Perfect transport weight with cab: below 2.5 tons
- Innovative Cylinder Inside Boom for extra robustness
  Exceptional value for money

### **E27**

#### **BETTER PERFORMANCE**

- Unique combination of superior stability and class-leading digging force
- Transport weight below the weight limits for appropriate trailers
- Small tail overhang allows operation in confined spaces

# **CHOOSE YOUR ANIMAL**

### **E27**z

#### **▶** MORE STABILITY AND COMFORT **WITH ZHS**

- Zero House Swing even with open door and heavy counterweight
- Largest cab on the market for this size of machine

As a true Zero House Swing (ZHS), the E27z offers the superior flexibility of movement when working close to walls, best-in-class 360° stability and a low transportation weight.

Flail mower

#### **VERSATILITY**

Up to 5 independent hydraulic auxiliary circuits:

• AUX1 – general purpose

• AUX2 – supporting functions (rotation)

• AUX3 – clam shell bucket (bucket diverter)

- AUX4 tilting coupler control
   AUX5 hydraulic coupler control

New 'Selectable Auxiliary Control' (SAC) system allows for control pattern customization and optimal attachment fit (integral part of AUX4 option)

• Selectable boom or arm mounted auxiliaries

**MULTI-TOOL CARRIER** 

- Geith, Klac and Lehnhoff hydraulic coupler option
- Lehnhoff type couplers with optional tilting adapters

Actual attachment compatibility may vary based on different machine configurations. Contact your dealer for actual attachment compatibility.
